Salary Prediction App

This app predicts the salary based on years of experience using a Simple Linear Regression model.

Enter Years of Experience 1:

```
15.00                                                           −    +
```

Enter Years of Experience 2:

```
12.00                                                           −    +
```

Enter Years of Experience 3:

```
20.00                                                           −    +
```

Enter Years of Experience 4:

```
3.00                                                            −    +
```

Enter Years of Experience 5:

```
0.00                                                           −    +
```

Predict Salaries

Prediction 1: For 15.0 years of experience → Estimated Salary = $166,468.73

Prediction 2: For 12.0 years of experience → Estimated Salary = $138,531.00

Prediction 3: For 20.0 years of experience → Estimated Salary = $213,031.60

Prediction 4: For 3.0 years of experience → Estimated Salary = $54,717.82

Prediction 5: For 0.0 years of experience → Estimated Salary = $26,780.10

This model was trained using a dataset of salaries based on years of experience. It uses Simple Linear Regression to make predictions.
